

Tim Huitt

Full Stack Engineer

Broomfield, Colorado
tim@timhuitt.com | timhuitt.com

Full Stack Engineer with a background in production systems and end-to-end application delivery. Experienced designing and owning complex systems from architecture through deployment, with a focus on delivering solutions through a business-first approach shaped by two decades across management, financial advisory, and data analytics.

SKILLS

Languages: JavaScript, TypeScript, Python, Java, SQL, HTML5, CSS3

Frontend/Backend: React, Next.js, Tailwind CSS, Bootstrap, Node.js, Express.js, NestJS, Django, RESTful APIs

Databases & Infrastructure: PostgreSQL, Google Cloud/Maps, AWS EC2, RDS, S3, SES, IAM, KMS, CloudWatch

Security and Compliance: OAuth, Auth0, NextAuth.js, Session Management, SSL/TLS

EXPERIENCE

Senior Full Stack Engineer

Medical Lien Services *Denver, CO, 8/2024 - Present*

- Sole engineer replacing Salesforce end-to-end for a healthcare-adjacent organization; designed, built, and independently operated the full production platform
- Architected a 70+ table relational data model supporting dual portal architecture; separate interfaces for internal staff and a network of several hundred external attorneys, unified on a single backend
- Executed full Salesforce data migration: 500,000+ records across 6 entity types with custom deduplication, merge logic, field resolution, and association mapping; included 90,000 documents imported to S3
- Designed and deployed HIPAA-conscious AWS infrastructure: VPC isolation, in-transit and at rest encryption, PHI access logging, signed URL document access, TLS in transit
- Built a custom QuickBooks integration managing facility-specific billing across 5 accounts with complex discount structures and multi-step transaction workflows
- Built a Google Maps integration for medical facility and provider discovery; filters by service type and distance to patient location, with direct form population on facility selection

Full Stack Engineer

DevLedger Independent, *2026 - Present*

- Built a full-stack freelance business management platform; including prospect pipeline, project and scope tracking, time billing, invoicing, notes and file attachments, and a comprehensive earnings and alerts dashboard
- Connected a PostgreSQL backend with Auth.js with Google and GitHub OAuth and a JWT session strategy
- Integrated a full seed-data demo; same routes and components, data source driven by session state
- Scope tracking with date-versioned requirements; dashboard alerts loaded via a cross-project query

Software Developer / Project Coordinator

Denver Analytics *Denver, CO, 02/2021 - 08/2023*

- Led the development of multiple applications, enhancing data analysis, file management, and data processing
- Coordinated with leadership to build applications essential to the processing of every project company-wide
- Reduced original processing times from over an hour to 1-2 minutes per session, a 98% reduction

Senior Financial Advisor

Merrill Lynch *Ridgefield, CT, 08/2012 - 02/2018*

- Designed applications for client management, documentation, and reporting, reducing task times by up to 80%
- Held Series 7 and Series 66 licenses, advising clients within a heavily regulated compliance environment
- Managed diverse client portfolios as part of a team overseeing \$500 million in assets
